C13765599 Web Development Nielsen evaluation

1. Visibility of system status
   System keeps users informed throughout

2. Match between system and real world
   All language is easy to understand and is consistent.

3. User control and freedom
   Home screen button clearly marked on each page

4. Consistency and standards
   All instructions are clear and unique

5. Error prevention
   Tested and found to be error-free

6. Recognition rather than recall
   All options are clearly labeled and visible. No user recognition required

7. Flexibility and efficiency of use
   Very simple web page and so not really applicable

8. Aesthetic and minimalist design
   No unnecessary information displayed. User given option to go to location
   of desired information

9. Help users recognize, diagnose, and recover from errors
   No errors found

10. Help and documentation
    All instructions are clear and simple to follow. Very few steps needed and
    very small chance of user getting lost
